The official website for Hyperkin's Game Genie for PS3, new website content has been added to the Game Genie page on the official website.Q: Change PHP regex to edit a paragraph I have an odd situation. I want to modify a paragraph of text (which is simply a list of items) foo bar baz I'd like to replace everything except "bar" with a new line: foo bar baz I'm just trying to change the text, and do it across all elements. Here is what I've got so far: preg_replace("/bar/","",$list); I just can't think of a way to keep track of what I've changed. A: Use preg_replace_callback()

In my case I have the position of a point on a sphere described with spherical coordinates (r,θ,ϕ) where r is the distance of the point from the center of the sphere and θ,ϕ are the angles of the point w.r.t. the center of the sphere. The points on a sphere are ordered as (r,θ,ϕ). The issue I am having is how to find the 3D points (x,y,z) of a 3D point on the surface of the sphere. In spherical coordinates the point is (r,θ,ϕ) and using trigonometry it can be shown that the points on the surface of the sphere are given by $(\cos(\theta)r, \sin(\theta)r, \phi)$. However, I'm having a really hard time getting to (x,y,z) with d4474df7b8
