Where else can you find that type of information written in such an ideal way? A: You have to use it like: import pandas as pd #dataframe is the name you choose for your table and dt is a type name so you choose the type of your dataframe df = pd.DataFrame(data=[["Test"], ["Test"], ["Test"]], columns = ['col1', 'col2', 'col3'], dtype = dt) Or you can import it to a dataframe like this: df = pd.read_csv("D:/Downloads/acct.csv") You can now do a lot of things to the dataframe like: df.head(10) df.tail(10) df[['col1', 'col2', 'col3']] df[['col1', 'col2']] df[['col1']] or many more. cnxps.cmd.push(function () { cnxps({ playerId: '36af7c51-0caf-4741-9824-2c941fc6c17b' }).render('4c4d856e0e6f4e3d808bbc1715e132f6'); }); Prime Minister Binyamin Netanyahu is expected to order the closure of an alternative channel for Palestinian broadcasts into Judea and Samaria at the end of the year, Channel 2 News reported on Monday. The Israel Defense Forces and Civil Administration are expected to start the closure within a month, according to the report, in the wake of the US peace plan which envisages the creation of a Palestinian state in the West Bank and East Jerusalem, including the Old City, minus East Jerusalem. Among those to benefit from the closure are the International Red Cross, which provides services to the Palestinians in Area C of the West Bank, and the Association of Israel, a local NGO. Netanyahu instructed the Defense Ministry to accelerate the transfer of the Palestinian Authority's budget to PA chairman Mahmoud Abbas in an apparent effort to compel the Palestinian leader to end his strike against Israel. In the first part of our interview, John Markoff, a New York Times columnist, and Susan Glasser, a former political editor at The Washington Post, talked about Edward J. Snowden, the former National Security Agency 2d92ce491b
