:Alcohol advertising and treatment in the United Kingdom. This study examined national alcohol advertising in the United Kingdom in the context of current European Union guidelines and the implementation of the first nationwide advertising ban for alcohol in the United Kingdom. The strategy for the ban was guided by the core concerns of the alcohol industry: namely, that advertising should remain as a key mechanism for promoting drinking. The findings show that alcohol advertising has had a major impact on drinking rates and drinking contexts in the United Kingdom. In particular, the findings demonstrate how the alcohol industry's focus on promoting alcohol has had a significant impact on alcohol drinking norms in the United Kingdom and that advertising was effective in helping shape the image of drinking. They suggest that a medium-term ban on advertising will be an effective measure to reduce alcohol harm. In addition, they highlight the need for further research on the effectiveness of different advertising bans and treatment strategies.

The team rarely tried to get Kanter involved on offense and he couldn't keep up with Russell Westbrook. Kanter's numbers – and OKC's record – suffered. On the nights when the Thunder took Kanter out, they generally went on to lose. "As a center, it's a challenge playing him," Thunder guard Reggie Jackson told TNT's Craig Sager. "As a coach, it's also a challenge. He
