FAQ

---

I'm currently using a script to download the files and get the download links and the expiry dates. import requests import urllib.request import json site = " page = './images/Locations\_Gallery/' folder = './Pdf/' pages = list() with urllib.request.urlopen(site) as r: for i in range(1,6): print('Visit {}'.format(i)) r = r.request('GET', page + str(i)) html = r.read() print(len(html)) soup = BeautifulSoup(html, 'xml') #print(soup) table = soup.find\_all('table') for row in table: a = row.find('a') title = a.find('a').text date = a.find('span').text page = a.find('a').get('href') pages.append({'title':title, 'date':date, 'page':page}) with open('Locations\_Gallery.json', 'w', encoding='utf8') as f: json.dump(pages, f, indent=4) This works fine but 4bc0debe42
