2022]

Autodesk Navisworks Manage is a full-featured project review application mainly addressed to professional architects, engineers and designers. It combines powerful visualization capabilities, measuring options and 3D rendering abilities into a single package, intended to help them thoroughly analyze each detail of a project. Relying on the robust rendering engine of any Autodesk product, it can generate photo-realistic representations of the 3D model, with shading and reflection effects, while also allowing real-time navigation. You can change the perspective, focus on certain sections, save important viewpoints and load them with a single click. Aside from the design-related issues, Autodesk Navisworks Manage can help you evaluate the efficiency of the lighting systems. Thanks to the integrated 'Clash Detective', you can easily identify interferences and solve problems before forwarding the construction plans to the client. The measurement options enable you to evaluate the project scale, while the integrated highlighting tools can help you emphasize on certain areas that require attention. Moreover, the customizable tags and comment boxes can facilitate collaboration and support team work. Its compatibility range includes various input file formats, such as 3DS, PRJ, DGN, DWF, DWFX, W2D and many more. Individual scenes can be exported to the local computer as images, 3D objects or animations. Alternatively, you can send them via e-mail or print them on paper directly from the program. The application can also generate comprehensive reports on the clash tests, tags or viewpoints. Autodesk Navisworks Manage is a complete building information modeling solution that can generate high-quality simulations of your designs. Providing reliable reviewing tools, it allows design visualization and quality assessment, while also encouraging collaboration among team members in order to deliver sustainable and innovative projects in a timely fashion. Autodesk Navisworks Manage Features: 1-Supports a variety of file formats. 2-Uses the robust rendering engine of any Autodesk product. 3-Enables real-time navigation, enabling you to move around in your model and view hidden areas. 4-Generates photo-realistic representations of the 3D model, with shading and reflection effects, while also allowing real-time navigation. 5-Can change the perspective, focus on certain sections, save important viewpoints and load them with a single click. 6-Aside from the design-related issues, Autodesk Navisworks Manage
