Asus AI Manager is a freeware utility to manage your ASUS system files and data. It provides users with a means of managing files and data access. Includes security features that will enable users to protect private information and restrict access to the sensitive files with a password. Read more: [News by Threat Type: ASUS AI Manager - Category:MalwareQ: Proper way to use a third party library in a symfony project I am developing a symfony application and I have to use the elasticsearchBundle. So I created an embeded server with the bootstrap.php which looks like this: public function getDependencies\(\) { return \[new](#)

```
\Elastica\Client(new  
\Elastica\Client\Builder() ->setHost(env('E  
LASTICSEARCH_HOST')), new  
\Elastica\Client\Serializer\XmlSerializer()  
]; }
```

And I placed a `conf/packages/elasticsearch.yaml` file where I have configured the location of the jar files for elasticsearch. I have also configured the `elasticsearch.yaml` in my `app/config.yml` like this:

```
elasticsearch:  
class: 'elastica.client.client' public: false #  
the server URL used to send requests to  
Elasticsearch # Warning: This setting must  
point to a server that the bin/elasticsearch  
server will be able to communicate with #  
set to '127.0.0.1:9200' to use the same  
server as the web server url: "
```

But when I try to access the elasticsearch
