you want to organize the items of your choice in, and the order in which the items appear in the menu. If you think that you have a lot of different files and folders that you need to move from one place to another, then you need to download and run the app. It is a simple process: simply click on the "Start"

button and follow the on-screen prompts to the letter. You will then get to see the interface shown above. You can navigate and search through your files as you would expect. You can select an item and move it to any of the folders you want. The app provides a very user-friendly interface, so we can say that
