Choose the folder where you want the templates to be installed. 13. Click "Open". 14. The templates will be installed. Steps to Install New Developer Express Templates 1. Click on the VisualStudio icon in your Start Menu 2. Click on the second (or third) tab in the menu 3. Choose your location and click "Install New Templates" 4. You will now be in the Templates Menu 5. Click on "Manage Custom Templates" 6. Locate the DeveloperExpress folder and open it 7. Find the folder you would

## What's New In VisualStart?

VisualStart is a very easy to use wizard designed to help you create new Visual Studio projects from your templates all stored in a convenient folder. ===== Add new templates from template folder ===== Add a new project by clicking on the "add new project" button in the VisualStart window, then selecting the template from the template folder. You can also select your favorite templates from our online catalog. As soon as you select a template, VisualStart will generate the code files (for example an html file) and solution files in the same location as your template. Add a new project by clicking on the "add new project" button in the VisualStart window, then selecting the template from the template folder. You can also select your favorite templates from our online catalog. If you wish to create new solution files, then your solution file location must be in the VisualStudioBasePath\solution folder. If you wish to create new project files then your project file location must be in the VisualStudioBasePath\project folder. ===== Saving new files ===== You can save your new files by clicking on the "save" button in the VisualStart window. ===== Running new projects ===== You can run your new project by clicking on the "run" button in the VisualStart window. ===== Cancel project ===== You can cancel your project by clicking on the "close" button in the VisualStart window. ===== Help ===== You can get help with any of the features of VisualStart by clicking on the "help" button in the VisualStart window. Installation Instructions: ===== 1. Copy the files in the VisualStudioBasePath\template\ file to your visualstudio template folder. 2. Copy the files in the VisualStudioBasePath\solution\ file to your visualstudio solution folder. 3. Copy the files in the VisualStudioBasePath\project\ file to your visualstudio project folder. 4. If you wish to create new project files, then your project file location must be in the VisualStudioBasePath\project folder. 5. If you wish to create new solution files then your solution file location must be in the VisualStudioBasePath\solution folder. 6. If you wish to create new html files, then your project file location must be in the VisualStudioBasePath\project\html folder. 7. If you wish to create new cshtml files, then your project file location must be in the VisualStudioBasePath\project\cshtml folder. 8. If you wish to create new mhtml files, then your project file location must be in the VisualStudioBasePath\project\mhtml folder. 9. If you wish to create
