One example is a file listing on the left side of the main window that shows the file date, size, creator, and permissions. I also like the fact that you can sort the files by the type of file you are looking for (e.g. Pictures, Music, Documents, etc.) and can have it displayed as a view in the main window (e.g. List, Collapsible, Tree, etc.). I am sure there are more you can do with this app as well." (5 stars) "I have used many of these shareware/freeware
