HindiPad For Windows

HindiPad is a lightweight application that aims to help you create documents by using Devanagari characters. It comes with a large collection of fonts that enable you to write articles, emails and other text files for your projects. If you need to create documents with Devanagari characters, you have the option to use an alternative keyboard or a dedicated application that uses special fonts. This program allows you to easily create your documents and export the text to RTF or HTML files. The main advantage of the application is the familiar interface that allows you to easily access all the commands required to format your text. In fact, the toolbar and menu layout resembles Microsoft Word and LibreOffice applications which reduces the learning time to minimum. In the main toolbar you have the possibility to switch between English and Hindi fonts in order to combine both Latin and Devanagari characters in your document. The program supports keyboard shortcuts and most of the Office key combinations can be used when formatting your text. The rich text format allows you to insert tables and other elements in your documents. Thus, the application enables you to add Excel worksheets, images and presentations with minimum effort. An useful feature is the ability to search for a certain English word in the HindiPad dictionary which can help the users who do not master the language. The word can easily be copied to the clipboard and inserted in your document. Overall, HindiPad is a practical tool that allows you to create text documents in Hindi and use them with other applications such as text editors or email clients. Tags: hindi application Hindi Pad Editor hindi writer hindi Pad hindi converter The most basic function of Font Creator Pro is the ability to create different text font styles and install them in a single file. Moreover, it allows you to add special formatting such as bold, italic, strikethrough, underline, underlined strikethrough and to create graphics from a single font style. The application includes a catalog with more than 400 font styles and you can easily search for a font family that suits your needs. Moreover, it includes the ability to customize fonts as well as to match them with your system's font styles. The catalog is organized as a tree view which enables you to quickly access each font category and to find the right font file for your needs. Font Creator Pro includes a font library with more than 3000 fonts that can be installed by using the drag-and-drop

What's New in the HindiPad?
