Memory Optimizer (MEMO) is a memory cleaner that will recover the maximum memory space available to you, your computer and programs. It works with the Windows operating system and will run in the background and monitor the Memory use by the system and the programs that are running. Once it has detected an application running that is using memory it will automatically close or disable such application. Download Memory Optimizer now and you will be able to use more memory on your computer and you will have a better performance. The full version of Memory Optimizer is a freeware that has no restrictions. Advance and easy to use all in one utility. The Advanced Mode detects any new running process and disabled it if it is causing memory leak, your application will run with minimum memory usage. Every process that the system or your application is running will be listed in the main window of the application. If your application or the system is leaking memory or running slowly, you will be able to find it. The Memory Optimizer will open each running program and see what each one is using, it will disable any application that has a memory leak and will open the program in full screen mode. Sometimes the memory leak is caused by a program that is running in the background (hidden windows). With this utility you can open hidden programs and fix the problem. Other reasons for memory leak: incorrect settings in Windows, a bad application and a wrong driver. Do you have trouble with slow internet speed on your home network?
