WcfStorm.Rest Product Key is an application which allows users to quickly test REST services. The software offers an intuitive user interface, while providing users with the ability to create and edit HTTP requests and to extract relevant information from responses. The tool has also been built with support for a number of different requests, including GET, PUT, POST, DELETE, HEAD and OPTIONS HTTP. The application can also perform automatic and manual HTTP performance tests, while it can also be used to create a request log that can be saved to and loaded from file. The users can also configure parameters of these tests, while creating their own or editing/deleting already existing ones. Additionally, the utility can save/load cookies in HTML format, can script requests and responses, and can display HTTP headers in a syntax-highlighted format. Scripting support has been also included in the software, as well as the ability to export results to Microsoft Excel and to generate performance reports.
