Aptana Studio is an IDE made for web-developers, programmers, and all those who need to do some coding in a particular language. This program is designed to be used for all kinds of languages, but it is especially optimized for web development. HTML, CSS, JavaScript, PHP, ASP.NET, and Ruby on Rails, the native languages for these files, are supported by this application. One of the best features is probably the Ruby and Rails support. Not only does Aptana Studio work perfectly with Ruby on Rails, but it is a completely independent solution in its own right. Another great feature is the support for PHP. This includes such functionality as in-place editing, auto-completion, run-to-complete, line numbering, code folding, and error reporting with syntax highlighting. Most of the popular features of Aptana Studio also work as standard in the IDE for Java and C/C++. For instance, you can arrange the toolbars in whatever positions you want, you can

set project-level breakpoints, and so on. This utility also comes with extensive support for Python. It includes advanced syntax checking, variable auto-completion, mixed Python/JavaScript editing, and JavaScript execution. All of these features make Aptana Studio very intuitive. In fact, you can even set up shortcuts for frequently used features like lines, searches, and code formatting. Aptana Studio is a very complete IDE. That is to say, it is not just a simple editor with code completion and syntax checking. It offers more than that, too. It has a great and extremely intuitive code editor. It is an extremely fast editor in terms of typing, switching, and navigating text, thanks to its advanced code tools. This integration is great for web programmers who can write their codes faster than ever. Aptana Studio also supports continuous compilation. The software has a built-in interpreter and a JavaScript engine for running JavaScript programs. What makes it even better is that you can manage multiple projects and run them simultaneously. Its expandability is tremendous. There are add-ons that are available online, as well as extensions for Windows, Linux, Mac OS X, and of course, Web servers. And when it comes to the licensing issue, Aptana Studio is a program that is suitable for both personal and commercial use. You can download it completely free of charge.
